Professional Summary

Data analyst combining a BSc in Mathematics (UBC) with an in-progress Master of Health Data Science (UNSW) and applied commercial experience. Built and maintained the weekly and monthly performance reporting stack for a semiconductor sales team, consolidating order, quotation and client data in Python and Excel PivotTables into dashboards and review packs used in sales meetings. Experienced in data wrangling, KPI reporting, web-scraped market research, and communicating analytical findings to non-technical stakeholders. Looking for a data analyst role where quantitative analysis supports commercial and operational decisions.

Technical Skills

- Programming: Python (pandas, NumPy, Matplotlib), SQL, Python web scraping for market intelligence
- Data and Query Tools: SQL, Excel (PivotTables, VLOOKUP, advanced formulas), relational data aggregation and cleansing
- Visualisation and Reporting: Dashboard development, KPI and performance reporting, analytical presentation
- Languages: English (professional), Mandarin Chinese (native)

Education

Master of Health Data Science - University of New South Wales (UNSW), Sydney
Sep 2026 - Feb 2028 (expected) | In progress

Statistical Foundations for Health Data Science; Management and Curation of Health Data; Health-Data Machine Learning; Statistical Modelling; Visualisation and Communication for Health Data

Focus: health-oriented data curation, feature engineering, predictive modelling, and communicating data-driven insight to clinical and operational stakeholders.

BSc, Major in Mathematics - The University of British Columbia (UBC), Vancouver, Canada
Sep 2022 - Aug 2025

Mathematical modelling; linear and integer programming; probability and statistical inference; stochastic processes; optimisation for resource-allocation problems

Professional Experience

Semiconductor Sales Assistant
Shenzhen Liduosheng Electronics Co., Ltd. (Ledsoon) | Shenzhen, China | Sep 2025 - May 2026

- Built the team's weekly and monthly performance reporting: consolidated sales, quotation and order data across client records using Python (pandas) and Excel PivotTables into dashboards and summary packs used in sales review meetings.
- Maintained the standardised client record system across active power-semiconductor and lighting client accounts, tracking quotation history, sample test feedback and end-to-end order status in a single source of truth.
- Owned the full sample-application cycle - application, dispatch and test-result tracking - coordinating with clients and internal teams to keep requests moving and clients informed.
- Tracked production and delivery progress across warehouse, internal departments and overseas clients; resolved shipment exceptions to maintain on-time order fulfilment.
- Applied Python web scraping to collect semiconductor industry intelligence, distilling findings into market insight notes that supported sales negotiation and prospecting.
- Documented meeting minutes and tracked action-item completion across the team.

E-commerce Operations Intern
Shenzhen Nanshan Tiantian Sports Technology Co., Ltd. | Shenzhen, China | Apr - May 2026 (1.5-month internship)

- Optimised product functional descriptions and keyword portfolios across product listings, improving organic search visibility and product exposure on retail platforms.
- Supported end-to-end new-product launches - coordinating on-site product photoshoots, organising visual assets, and completing formal listing publication across online retail platforms.
- Ran competitor benchmarking and market comparison analyses, synthesising differentiated product advantages to inform listing positioning and marketing copy.
- Liaised with upstream OEM manufacturers to validate product specifications and resolve information discrepancies before publication.
